

Addendum to the Green Energy EPC contract signed and dated \_\_ / \_\_ / 2021.

**BATTERY OPTION:**

The Customer may opt to cancel the battery contract order in writing anytime within 12 months from the date above, provided notification in writing is confirmed to be received at least a minimum of 3 business days prior to the scheduled day of installation.

Customer authorization is required before Green Energy EPC will create and submit the solar battery design to the permit office and, if applicable, the HOA.

If the cancellation request is received after the site survey is completed, then a \$150 site survey fee is non-refundable. Any change orders must be identified during the site survey meeting.

If the cancellation request is received after the CA SGIP Application is prepared to be submitted, then the \$297 SGIP application preparation fee is not refundable. (Includes the site survey fee).

If the cancellation is received after the permit design is created to be submitted to the permit office and/or HOA for review, \$695 Design fee is non-refundable. (Includes the site survey and SGIP preparation fee).

**\*The SGIP Application fee is 5% of the eligible SGIP incentives. This fee shall be paid upfront at the time of SGIP Application submission. The System Owner is responsible for paying this fee.**

**This fee is refundable at the end of the SGIP Rebate process, upon approval of the application.**

**This fee is also refundable if the SGIP Rebate Application is NOT approved.**
